

4th NASG Meeting, Toulouse, LEGOS, Observatoire Midi Pyrénées, Coriolis Room

Tentative Agenda (last updated 04 December 2002)

10:00-10:10 **Welcome and meetings objectives**

Véronique Garçon

10:10-10:30 **Stoichiometry of new production and export in the North Atlantic ocean**

Wolfgang Koeve

10:30-10:50 **View from space (ocean color) in the North Atlantic**

Dave Siegel

10:50-11:10 **Carbon balance of the subtropical NE Atlantic**

Emilio Fernandez

11:10-11:40 Coffee break

11:40-12:00 **POMME synthesis**

Laurent Mémerly

12:00-12:20 **Physical validation of a North Atlantic ocean model assimilating altimetry data prior to biogeochemical studies (1993-2001)**

Véronique Garçon

12:30-13:45 Lunch

13:45-18:00 **NASG synthesis posters for the OSC Washington. Point on data management and availability for North Atlantic.**

Poster #1: North Atlantic large-scale biogeochemical diagnostics (from space down the abyss)

Poster #2: North Atlantic - time series stations and process studies

Poster #3: Modelling and data assimilation (towards GODAE)
