

## Call for Papers from the JGOFS North Pacific Task Team

### *Special Deep-Sea Research Volume Part II (Topical Studies in Oceanography) on North Pacific Biogeochemical Processes*

On behalf of the North Pacific Task Team (NPTT) of the Joint Global Ocean Flux Study (JGOFS), we cordially invite you to submit manuscripts to a special Deep Sea Research issue on North Pacific Biogeochemical Processes. As the last JGOFS field campaign, unprecedented biogeochemical data sets, in both scope and accuracy, are now available for the western and eastern North Pacific. The emerging data have led to improvements in our understanding of how biogeochemical cycles function in the North Pacific. The purpose of the special issue is to provide an opportunity for scientists involved in the observational and modelling activities in the North Pacific to present the results of the North Pacific Process Study and other JGOFS-related field programs in the North Pacific and adjacent marginal seas. Of particular interest will be papers on the east vs west difference in the North Pacific, comparisons of time series between PAPA, KNOT and possibly HOTS, and the North Pacific Intermediate Water.

Our goal is to have this issue published by spring 2002. To meet this target date, manuscripts, must be submitted to the Guest Editors (listed below) before November 1, 2000. Articles will be reviewed following the normal procedures, so that all accepted and revised manuscripts can be sent to Deep-Sea Research-II Chief Editor in early October 2001. If you are interested in contributing within the mentioned time schedule, please contact one of the Guest Editors for further details:

Dr. Toshiro Saino  
Institute for Hydrospheric-Atmospheric Sciences  
Nagoya University  
Furo-cho, Chikusa-ku, Nagoya,  
464-8601
